CUSTOMIZED HIGHLIGHTS MADE TO MEASURE

HIGH-QUALITY PRECIOUS METALS
FOR EVERY OCCASION

Geiger Edelmetalle AG develops and produces bars, medals and coins from the finest gold, silver and other metals according to your individual requirements. Orders for large quantities as well as small series in minted, engraved or printed form are possible. Our designers conceive and create individual products according to your ideas.

Popular sizes include bars and medals from 5 grams to 1 ounce for example. Of course, many other specifications from our extensive portfolio are also possible. Your product can also be provided with various finishes. We support you from the initial idea to the ennoblings product.

We
COMBINE

INDIVIDUALITY

BRAINSTORMING

TOGETHER WE WILL FIND
YOUR INDIVIDUAL PRODUCT

ONE STOP
SERVICE
STEP BY STEP

We are specialized in the production of high-quality bars, coins and medals. We can also produce cast bars made of gold, silver and copper with your own company logo or motif. Whether company, institution or private individual, the minting of medals or bars is popular as a high-quality gift and as a present for good customers and partners. City or company anniversaries are also a perfect occasion for the production of anniversary coins in large quantities. We handle high-volume orders for the investment and collector sectors of the precious metals industry competently and with the utmost care.

Do you have ideas and would like to realize your individual highlights?

We will be glad to work with you to find ways of turning your ideas into reality.

Get in touch with us.

auftragsfertigung@geiger-edelmetalle.de

Please allow sufficient lead time for the implementation of new products. The minimum order quantity for custom-made products varies depending on the specification.

We will be happy to advise you and submit you an offer.

PRODUCT DESIGN

WE GIVE YOUR PRECIOUS METALS
THEIR OWN SHINE

In addition to the production of your coins, medals and bars, Geiger Edelmetalle also offers you the service of design creation. We accompany you from the initial idea to the finished product. Of course, it is also possible to supply your own designs. In order to achieve an optimum minting result, the data is processed by our design team for the production of the minting tools.

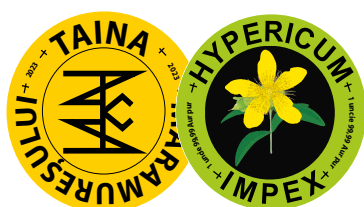

Layout example

ONE STOP SERVICE / STEP BY STEP

Our experienced design team conceives and designs your precious metal product entirely according to your wishes or your own designs. We will tailor your products perfectly to your occasion. Contact us, we will be glad to advise you.

Finished product

1

SELECT PRODUCT AND EXCHANGE IDEAS

Our product portfolio is diverse and the options are vast. Adapted to your ideas and in line with your personal spending plan, our experienced staff will be happy to advise you on your individual product. Precious metal is a matter of trust, so our offers are of course non-binding and transparent.

2

DEVELOP MOTIF AND RELEASE DESIGN

Once you have chosen and ordered the right product for you, our designers will start developing your personal motif to mint. Here you can provide us with images, texts, logos and other wishes as a basis. As soon as you have approved your design, the production of the tools required for theminting begins.

3

SAMPLING AND MAIN QUANTITY

With an initial physical sample of your product, you get to see your product for the first time in minted version. Once the sample has been approved, of the main order quantity begins.

4

DELIVERY OR COLLECTION OF YOUR PRODUCT

reverse side

ENGRAVING BARS

As a memento of special occasions, a birthday, a wedding or a birth. Our personalized engraving bars are the perfect gift or memento for very special occasions such.

APPLICATIONS

MOTIF BARS

APPLICATIONS

A precious metal product can be further valorised with applied gemstones, embedded glass or other objects. The theme or occasion is emphasized in a special way through the application. Please contact us about the possibilities.

The application can be provided by the customer.

MOTIF BARS

On request, we can produce bars, coins and other precious metal products in completely free forms.

REFINEMENT

REFINE YOUR PRODUCT

Colorful
diversity

GOLD PLATING

Fine partial gold plating give precious metal products a special shine and increases their attractiveness. We offer partial gold plating in three color variants. Yellow gold, green gold and rose gold. Of course, we can also apply this technique to your own products and those of your customers.

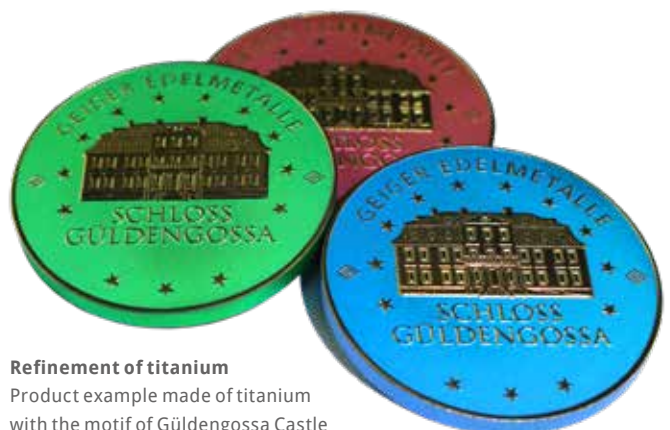

COLORING

Colorization makes your individual embossing stand out even more. The print image can be varied on each coin or bar, making it possible to create truly unique pieces. Your precious metal product can be fully or partially printed.

COLORLED TITANIUM COINS

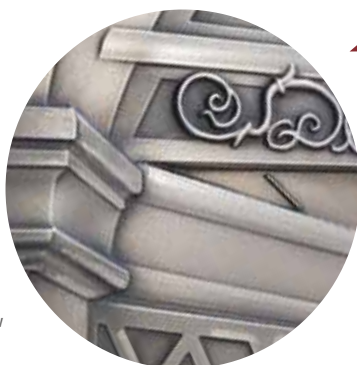

Using a special process, we have created the possibility of coloring titanium coins in striking colors. A very colorful product refinement makes the colorful unique pieces into coveted collector's items.

Refinement of titanium
Product example made of titanium
with the motif of Güldengossa Castle

PROOF QUALITY

In the elaborate production process of the Proof or Proof-Like minting stage, we focus on flawless surfaces and the highest minting quality. This results in exceptional attention to detail. Each minting is hand-picked and subjected to strict quality controls.

Detailed view

ANTIQUE FINISH

An antique finish gives coins and bars a nostalgic and timeless appearance. This surface treatment simulates the natural ageing process and creates a dark patina.

BLACK MIRROR

In contrast to the antique finish, the surface is glossy and looks like a black mirror.

SERIAL NUMBER

With an individually engraved or printed serial number, your products are limited and remain traceable. This is a great security feature for your customers.

UV COATING

The fluorescent coating is an innovative development in the precious metal industry. The bluish coating on the bars lights up under so-called black light. UV printing is particularly valued as a security feature for precious metals.

RIBBED

With a fluted edge, you can give your bar or medal a traditionally authentic look with a familiar feel when holding and looking at the precious metal.

HIGH RELIEF

EMBOSSING WITH HIGH RELIEF

A minting with high relief offers an impressive visual experience. The low weight in combination with maximum relief make the coins particularly attractive. Small editions are possible, which increases the exclusivity. The feasibility depends on the respective motif.

PACKAGING DESIGN

THE PACKAGING AS QUALITY AMBASSADOR

Tailored to your product and your ideas, we give your packaging an individual design. Whether it's an elegant case with a designed insert or an individual certificate. Offering packaging in various formats and with a wide range of design possibilities opens up many creative options for you.

PLASTIC CAPSULE - ROUND OR SQUARE

The acrylic plastic capsules offer effective protection for bars, medals and coins. They protect your shiny objects from external influences such as dust and fingerprints.

SECURITY CAPSULE FOR SQUARE BARS AND COINS

Your shiny pieces are particularly safe in an acrylic capsule, as the capsule can only be opened by destroying it. A certificate of authenticity, which is printed for your precious metal, is a further security feature.

Square safety capsule

CASES

Elegant cases upholstered on the inside with soft black satin offer creative design options. Printing on the case lid or a certificate insert are also possible according to your wishes.

WOODEN BOXES

High-quality handmade wooden boxes give your precious metal products a very special and natural charm. Embossing, for example in a gold or silver colour, as well as an engraved plate on the outside or inside is possible for individualization.

GIFT OR BUSINESS CARD WITH BAR INSERT

Would you like to expand your gift or business cards with a silver or gold bar?
This card will never be thrown away!

Example: 1 g bar
as a gift or business
card made of PVC in
credit card format

Feingold 999.9	1000 g	91.2 x 91.2 mm

INNOVATION BY TRADITION

- ◇ The control room of the former lignite-fired power plant has been transformed into a modern production facility without losing its old charm. This is where we combine our production and the trading and logistics center under one roof.

A ONE STOP SERVICE

Thanks to our in-house production, we can guarantee our customers a high degree of flexibility. We are independent of suppliers, can react actively to market situations and can manufacture and deliver even large quantities quickly if required.

The pooling of know-how and resources also provides an ideal basis for joint research work.

EXCELLENT QUALITY

Our production facility is certified according to the ISO 9001 standard. This seal of approval shows compliance with quality management standards on an international level. In accordance with these standards, we work along the entire production chain with the aim of manufacturing products of the highest quality for our customers.

HIGH QUALITY RAW MATERIALS

The raw material granules we use are of excellent quality and sourced exclusively from suppliers certified and approved by the London Bullion Market Association (LBMA) Good Delivery Standard. Geiger Edelmetalle AG has been accepted as an Affiliate Member of the London Bullion Market Association (LBMA) since the beginning of 2021.

SUSTAINABLE PRODUCTION

The granules are processed using state-of-the-art production equipment, which are operated with a significant proportion of green electricity. Photovoltaic systems on the roof of the production hall, an ecological water treatment plant and an optimal circulation principle of our cooling water system enable resource-saving production processes.

MODERN PRODUCTION

MADE IN GERMANY

Precise manual work in the casting of ingots and modern robot systems are used during production

Melting

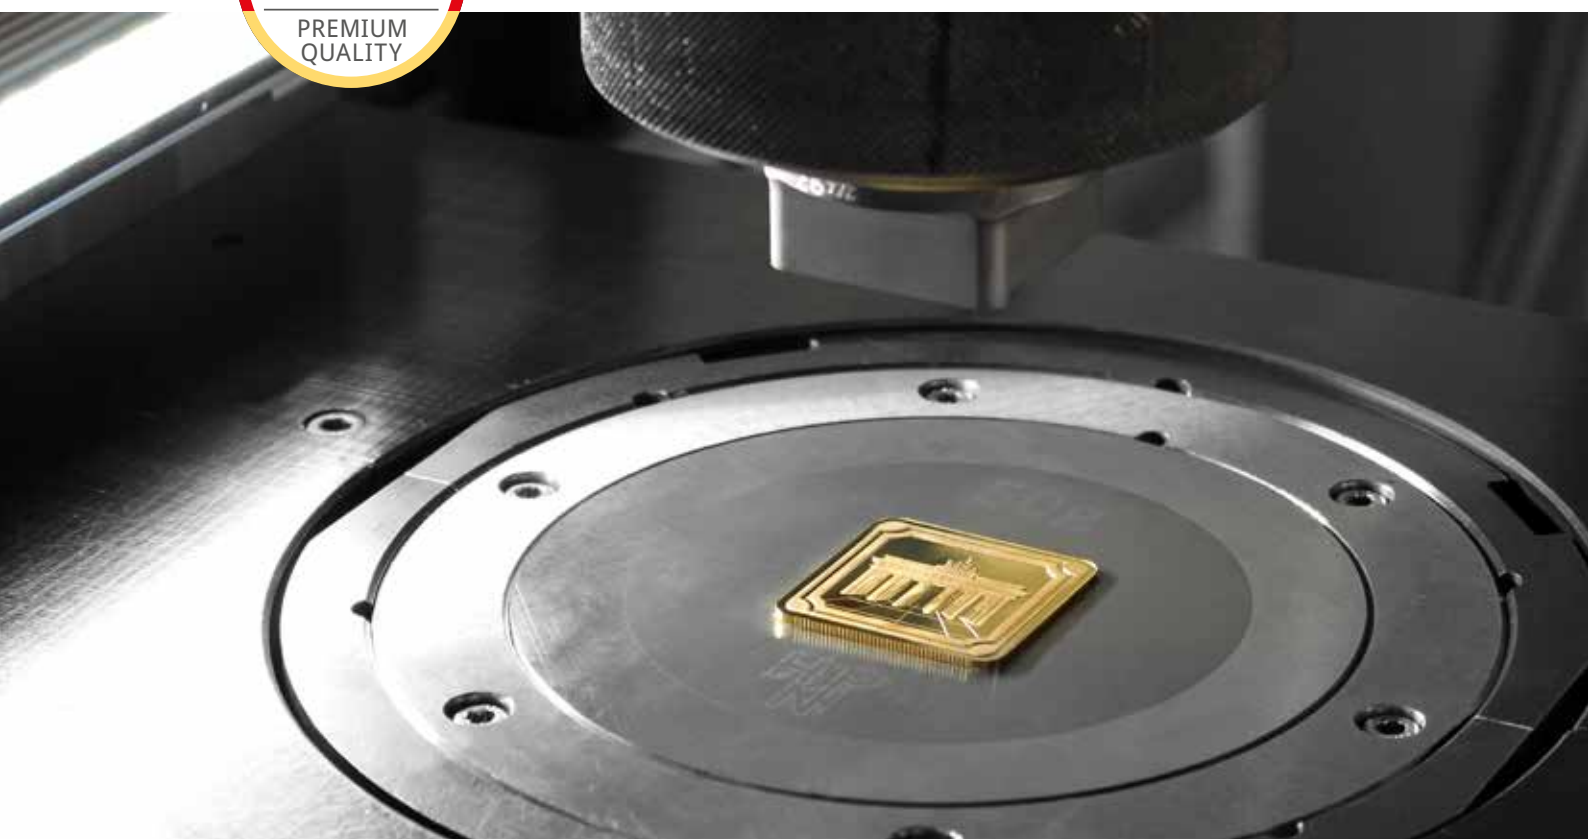

Punching of blanks

Embossing

In unserer nachhaltigen Produktionsstätte werden Barren, Medaillen und Münzen nach höchstem Anspruch hergestellt. Unser Qualitätsbewusstsein „Made in Germany“ sowie unsere hochwertigen Rohstoffe stehen an erster Stelle. Bei Gewicht, Größe, Material und Design sind der Kreativität kaum Grenzen gesetzt.
